Emergency Communications for Safety and Security

Emergency Stanchions and Wall Units

- Emergency Communication
- Broadcast Notification
- Areas of Rescue
- Audio Paging

Emergency stanchions and wall units enable security and safety for individuals to call for assistance or receive directions in multiple environments.
Common use cases include:

Parking garages and lots in all facilities (entry points, exits, and throughout the facility).

Stairwells in healthcare and corporate buildings.

Areas of rescue in all facilities of all sizes.

Off-site and remote areas in airports and mass transit.

College and K-12 campuses and corporate walkways.

Automatic entryways for visitor access.

Features and Benefits

- Economical and reliable emergency communications

- Notify large masses of people with a clear and intelligent message

- Extremely durable design resists vandalism

- Rust prohibitive coating design can withstand prolonged exposure to harsh environments

- Mount a surveillance camera for a high vantage point view

- Easy to install and use

- Meets all ADA requirements

- Color, signage, and lettering can be customized to meet customer requirements

- Stanchions/towers: available in blue, red, and yellow. Other colors available upon request

- Wall units are in stainless steel. Painted colors available upon request

- Voltage Options - 120 VAC, 12/24 VDC and 24 VAC

- Mount IP speakers externally or internally for broadcast messaging

- Concealed, high-power speakers provide 360° coverage

- LED blue lights can be configured to be lit at all times or flashing once a call is placed on the intercom

- Lightweight construction for one-person installation (for some units)

ICX-ALPHACOM

The ICX-AlphaCom Platform is an intelligent communication platform that provides management and security services, and allows for seamless integration into the cloud and other applications. ICX-AlphaCom offers:

- Integrated, Intelligent Communication Management and Security
- Scalability and Robustness

- Interoperability

IC-EDGE

The IC-EDGE is a next-generation, intelligent communication system that delivers unrivaled, out-of-the-box sound quality, interoperability, security, and ease of use. Zenitel's range of security communication solutions can be customized to meet specific requirements and needs.

SIP

Zenitel offers products specifically for integration in a pre-existing or new SIP system. In addition we've made the inside of our products available as KITs for you to customize for any need. This enables anyone to customize and design tailor-made solutions. Quality, combined with flexibility, are only two of the many reasons why Zenitel products are found all over the world. By presenting you with SIP products and solutions, we hope to inspire you to discover the endless possibilities of SIP and identify how Zenitel SIP products can complement your communications system.
